What is ISO/IEC 27701:2019 (PIMS)?

ISO/IEC 27701, also abbreviated as PIMS (Privacy Information Management System) outlines a framework for Personally Identifiable Information (PII) Controllers and PII Processors to manage data privacy. Privacy information management systems are sometimes referred to as personal information management systems. This standard is an add on certification with the ISO/IEC 27001 standard which provides a framework for an Information Security Management Systems (ISMS) that enables the continued confidentiality, integrity and availability of information as well as legal compliance. This newly published information security standard also provides guidance for organizations looking to put in place systems to support compliance with GDPR and other data privacy requirements.

Benefits of the ISO/IEC 27701:2019 (PIMS)?

Privacy Information Management Systems helps to:

- demonstrate effective privacy data management
- establishes the parameters for a PIMS in terms of privacy protection and processing personally identifiable information (PII)
- increase sales, improve quality and enhance customer satisfaction
- increase data security and competitive advantage, creating safer workspaces and reduce the risk of loss or damage of data.
